

The Most Innovative Solution designed for modern world

FireEye with KDDI

FireEye is dominating cyber security market!

FireEye is the leading provider of next-generation threat protection

The pioneered technology provides comprehensive, unique, and innovative enterprise solution which is taking over global market share of over 60%.

Multi-vector analysis detects blended, multi-stage attacks including zero day attack

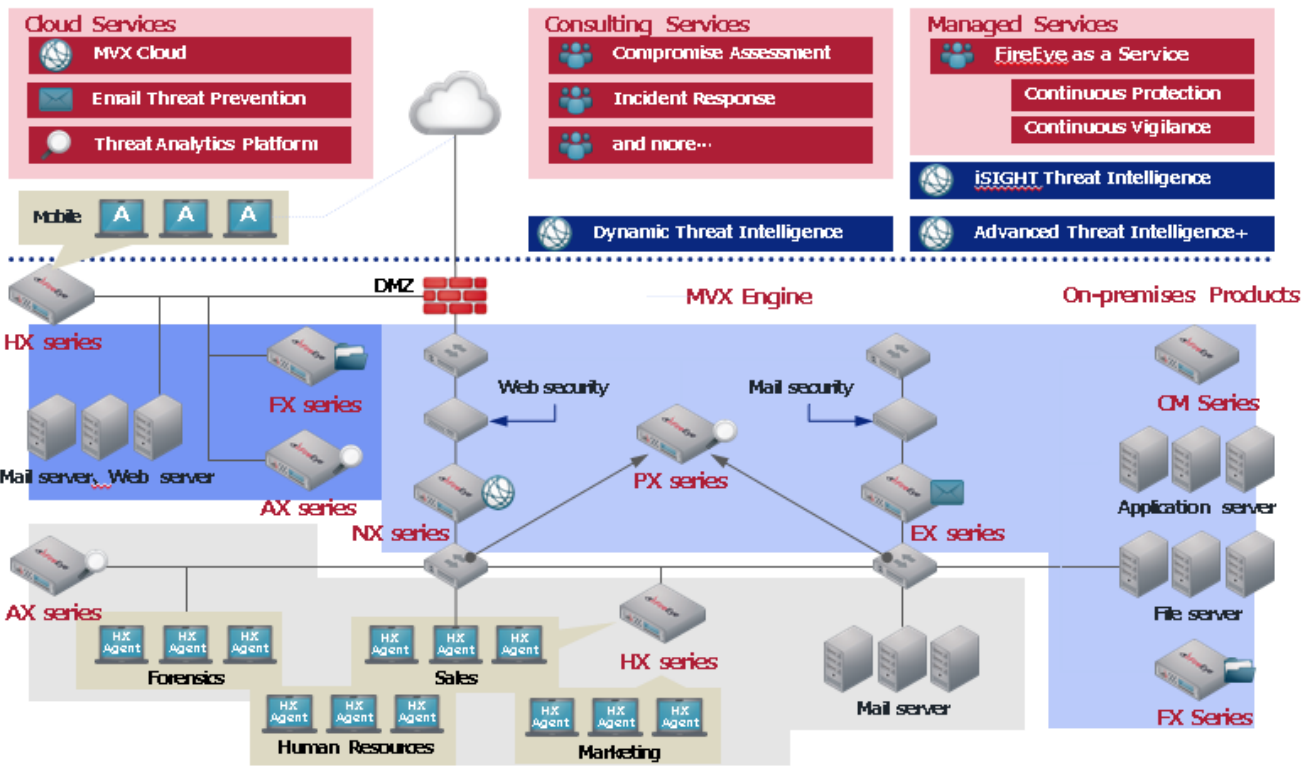

FireEye unique technology identifies entire attack including 'unknown exploit' that targets OS or app vulnerabilities ,achieving striking result of finding zero-day exploits!

Real-time analysis prevents malware from spreading

VM engine's analysis halts malware spread by taking statistic and dynamic analysis(MVX) and sharing the results in the cloud(DTI) right after the analysis to identify unknown malwares. A real time global exchange of analysis data makes it possible to protect against entire thread.

FireEye Threat Prevention Platform

Security management is now for top a management concern.
