

Cloud-based Camera Managed System
**KDDI IoT Cloud Standard
LIVE Course**

Real Time Cloud Recording and Storage with Easy to use Video Solution!

Easy recording with Cloud storage!

Recorded videos are stored for 30 days, max 90days on the cloud server through a secure network. Videos are accessible through a single console from anywhere at anytime. No recording device installation required.

Hassle-free setup!

All you need to do is install the camera and login to the single web console from PCs or smartphones.

International contract and technical support!

KDDI provides global support both pre and post installation. Customers have the option to manage their affiliate contracts individually or consolidate them into one international contract. We are flexible in suiting your budget and business setup.
