

# What is RPA ("Robot Process Automation") ? How RPA can revolutionize the way we work

**Free**

(Pre-registration required)

## Summary

Increasingly in use in Europe, the U.S.A., Japan, and China, RPA is now entering the Myanmar market. A tool that can aid in revolutionizing the way business is done, RPA is likely to be a necessity for businesses looking to increase their productivity. In this seminar, we will explain how RPA can change the way business is done and introduce case studies from other countries.

### Topic ① : What is RPA?

Together with a demo, we will explain the basics of RPA.

### Topic ② : UiPath, the RPA tool

We will explain UiPath, the world's most popular RPA tool, including its advantages and the vision that drives it.

### Topic ③ : RPA users within Myanmar

There are companies within Myanmar that have started using RPA in their businesses. RPA is ready for use in Myanmar.
